

COVID-19 Policies & Procedures

CampJCC follows guidelines by the CDC and FSSA for essential childcare programs, as well as standards and best practices set out for equestrian and tennis programs (focus on skill development and non-contact competition). CampJCC staff are closely monitoring these guidelines for updates throughout the state reopening process and will update them accordingly. Any updates will be communicated with families through email.

General Guidelines

- At drop-off, a CampJCC staff member will take each child's temperature with a no-touch thermometer. Children and parents will remain in their car during this procedure.
- If a child shows a fever of 100.4°F or above, in order to reduce the risk of contamination, they will not be permitted into the building and the fevered individual will be prohibited from the JCC campus for a minimum of 72 hours.
- **For any child sent home due to illness, he/she can return to camp after 72 hours, with the last 24 hours being symptom- and medication-free.**
- The 72-hour minimum does not begin until the initial fever has broken and the person's *normal* temperature has returned. **The 72 hours will start over if:**
 - The person's fever returns.
 - The person takes fever-reducing medication **within the last 24 hours of the 72-hour period**, at which point the 72 hours will not begin until the medication has worked its way out of the individual's system.
 - The person starts experiencing other COVID-related symptoms, regardless of if the fever is still present or not.
 - The person has not contacted a health care professional upon the program director's request, based on the severity and/or duration of the initial fever.
- All JCC staff will have their temperature checked daily upon arriving to work.
- Only JCC staff and children will be permitted in the Kraft Youth Wing.

COVID-19 Policies & Procedures

General Guidelines, cont.

- Counselors will clean high-touch areas throughout the day, while custodial services will thoroughly clean the Kraft Youth Wing every night.

Face Coverings

- Children will wear masks in public indoor areas, i.e. when traveling to/from different areas of the JCC (the Kraft Youth Wing is considered private since only CampJCC staff and children are allowed in the wing, so children may remove their masks while in the wing). Staff will wear masks in all indoor areas.

Grouping Guidelines

- Children will be grouped with a ratio of 20:1 and **social distancing will be utilized.**
- Each group will have a home base area outside at the Sablosky Camp Pavilion.
- If groups are in a large room together, masks will be worn by all children and staff.
- Camp groupings will be assessed weekly and may be adjusted to meet the needs of the camp.

Positive/Possible Positive Case Guidelines

- **Any child with a temperature of 100.4°F or more and/or who is exhibiting symptoms will be denied entry and asked to stay home for at least 72 hours until he/she is fever-free (without the use of fever-reducing medication) for the last 24 hours.**

COVID-19 Policies & Procedures

Positive/Possible Positive Case Guidelines, cont.

- **Any child that has come in close contact with a person with COVID-19** will be prohibited from returning to the JCC campus for a minimum of 14 days.
- **If any family member is voluntarily tested, regardless of the reason, CampJCC Staff MUST** be contacted prior to the test date and no one in the household will be permitted to return to the JCC campus until a negative test result is received.
- **CampJCC Admin will notify families of any open tests** of any individuals (staff or families) associated with the program. Families will be notified when test results are received.
- **If a child has symptoms that begin during camp**, staff will contact his/her parents for early pick-up. The child will stay isolated from other children until a parent/guardian arrives.
- **If there is a confirmed COVID-19 case**, the CampJCC team will contact the Marion County Health Department (MCHD). Programming will close as determined by MCHD. Families will be communicated with immediately with any further updates.
- **If a positive case occurs for a child or counselor, CampJCC will close and all staff and children in the program must quarantine for a total of 14 days, starting with when the person last attended camp.** The 14-day period includes the time spent waiting for test results. In the case of a positive result, CampJCC staff will notify parents in the program by email and phone. The number of days the program will be closed is based on the results received. If the positive case is a staff member or camper, CampJCC will notify all families in the program.
- If there is a positive case in a household, any children from that family will quarantine for 24 days before returning to camp. This 24-day period ensures that children in the home did not become positive at any time during the positive family member's quarantine.
- All directives given by MCHD will be followed.
